

## VES 030-340

### Fan coil unit For ducted installations

Cooling capacity from 1,82 to 5,70kW  
Heating capacity from 1,25 to 10,95kW

- Horizontal or vertical installation
- Heat exchanger developed to optimize the performance sensitive
- Versions for 2/4 pipe systems
- Large range of available static pressure

#### DESCRIPTION

Ducted fan coil, for heating, cooling and dehumidifying, specific to work in sensible environment. The fan unit at available working pressures, brought internal insulation, ensure excellent acoustic comfort levels. The small dimensions and easy installation make the fan coil designed for 2 and 4-pipe applications. The main coil, reversible during installation, is designed to ensure an high heat transfer, ideal for applications in sensible environment.

#### FEATURES

- Main standard coil or increased for 2-pipe systems
- Main standard coil and additional heating coil (accessory) for 4-pipe system
- 3-way valve accessory
- 2-way valve accessory for variable flow systems
- Fan assembly, high useful head, with aerofoil designed for high performance and simultaneously low-noise comfort
- Centrifugal fans plastic material, in order to reduce power consumption by increasing the ventilation efficiency
- Compatible with the VMF system
- Large range of controllers
- Large range of accessories to satisfy all installation requirements
- Discharge connection supplied loose
- Air filter Class G3, for easy removal and cleaning
- Internal insulation in fire Class 1
- Protective rating IP20
- Fan housing in plastic material removable for easy and useful cleaning
- Easy of installation and maintenance
- Full compliance with safety standards.

#### ACCESSORIES

##### Control panel

A range of dedicated controllers, wall-mounted or on the machine, is available but it is essential to choose between these panels for simple and complete tuning, for more details please refer to the dedicated sheet.

#### Probes and accessory for control panels

- **SW3:** water temperature probe allowing automatic season change on electronic controllers supplied with water-side change over
- **SWA:** external probe accessory (length = 6m). The probe detects the temperature of the ambient air if connected to the connector (A) on panel FMT21; the ambient air temperature probe incorporated in the panel is automatically deactivated. Detects the temperature of the water in the system, for ventilation consent, if connected to the connector (W) of the FMT21 panel. Two SWA probes can be simultaneously connected to the panel FMT21.
- **SIT3-5:** Thermostat Interface Card allowing the creation of a network of fan coils (max. 10) commanded by a central control panel (selector or thermostat).
- **SIT3:** commands the 3 fan speeds and must be installed on each fan coil within the network; receives the commands from the selector or the SIT5 card.
- **SIT5:** commands the 3 fan speeds and up to 2 valves (four pipe systems); sends the thermostat's commands to the fan coil network.

#### VMF system

**VMF-E0X:** a thermostat accessory to be secured to the side of the fan coil, fitted as standard with an air probe and a water probe, it controls systems with 2 pipes, 4 pipes, 2 pipes + Cold Plasma, 2 pipes + UV lamps, 2 pipes + Heating element. Equipped with an external contact to be used as a remote ON-OFF at low voltage. By means of 2-wire serial communication, this thermostat allows for the creation of a single fan coil area (1 master + maximum 5 slaves). Compared to the previous model, thanks to a different dip switch configuration, it allows implementing new features:

- In systems with two pipes and a heating element, the latter can be activated as a complete replacement, allowing you to warm the environment exclusively with this accessory.
- Dualjet features are available in standard software and can be set via dip switch.

The thermostat is protected by a fuse

##### VMF-E19: like VMF-E0X plus:

- Economy contact/presence sensor

- Additional water sensor for overall control in 4-pipe systems (with VMF-SW1 accessory).
- Serial RS485, ModBus RTU protocol, for centralised control.
- Possibility of inserting expansion boards for future developments. The VMF-E19 accessory must be therefore used in masters in the presence of multiple zones, or for communication with the chiller/heat pump
- Compatibility with the VMF-IO accessory
- Compatibility with VMF-LON expansion board

**VMF-IO:** Expansion board that expands the availability of Digital Inputs and Outputs, configurable via dip switches, thus making it possible to control the thermostat via an external BMS without using a local user interface (e.g. VMF-E2 or VMF-E4X). The expansion board can be used to configure the MODBUS addresses of the single thermostats included in a system, thus avoiding having to interact with the user interface for allocating an address and, most importantly, in order to replicate the address when replacing thermostats.

**VMF-LON:** Expansion that allows interfacing with a thermostat with BMS systems using the LON protocol.

**VMF-E4X:** is a wall-mounted user interface to be combined with VMF-E19 and VMF-E19I accessories for drawer grids. Featuring an innovative, extremely slim and cost-effective design, it allows running functions via a capacitive touchscreen keyboard with LCD display. You can choose to adjust the environment with a panel-mounted sensor probe (standard), or with the fan coil probe to which it is connected, or through mediated reading. It also enables the activation of an air purifier (Cold Plasma / UV Lamp) and a heating element. Light grey front panel PANTONE COOL GRAY 1C

**VMF-E4DX:** is a variant of the previous code but with a light grey front panel PANTONE 425C (METAL)

- **VMF-SW:** water probe to be used, if necessary, to replace the one supplied as standard with VMF-E0X, VMF-E19 and VMF-E19I thermostats, for installation upstream of the valve
- **VMF-SW1:** extra water probe to be used for 4-pipe systems with VMF-E19 and VMF-E19I thermostats for overall control in the cold range

#### Hot water coil

- **BV:** Single row hot water heat exchanger. Not available for versions with Plasmacluster.

#### Valve kit

- **VCF\_X4:** Valve kits for single coil units, installed in 4 pipe systems with totally separated "Cooling" and "Heating" circuits. The kit consists of 2 valves with 3-way 4 port connection complete with electro-thermal actuators, insulating shells for the valves and associated hydraulic piping. The VCF1X4L valve kit allows left side connection.

- **VCF:** kit containing a motorised 3-way valve with insulating shell plus coupling and pipes in insulated copper. Applicable for standard or oversized main coil. Available with 230V and 24V~50Hz power supply.
- **VCFD:** Kit consisting of powered 2-way valve, copper couplings and pipes applicable for standard or oversized main coil. Available with 230V and 24V~50Hz power supply.
- **VJP/VJP\_M:** Control and balancing combination valve for 2 and 4 pipe systems to install outside the unit, supplied without fittings and hydraulic components. The valve, which can guarantee a constant water flow rate in the terminal, within its operating range, is available with 230V and 24V~50Hz power supply.
- The VJP is controlled by on-off logic with compatible control panels (accessories) The VJP\_M is controlled by modulating logic with panels not supplied by Aermec The design water flow rate is crucial to refine the selection of the valve shown in the compatibility table.

#### Accessory for Installation:

- **AMP:** kit for the wall mounting installation.
- **BC:** Auxiliary condensate drip tray.
- **DSC4:** Condensate drainage device for use when natural run-off is not possible.
- **SE:** External air damper with manual control

#### Ducting accessories:

- **RDA\_V:** Straight intake connection with rectangular flange.
- **RDAC\_V:** Straight intake connection with circular flanges.
- **RPA\_V:** Intake plenum with rectangular flange.
- **RDMC\_V:** Straight discharge with circular flanges. Internally insulated.
- **PA\_V:** Intake plenum with circular flanges. Flanges in plastic material.
- **RPM\_V:** Discharge plenum with rectangular flange. Internally insulated.
- **PM\_V:** Discharge plenum with circular flanges. Internally insulated. Flanges in plastic material.
- **KFV10:** Circular flanges kit for intake/discharge plenum.

#### Grid:

- **GA:** Intake grid with fixed louvers.
- **GAF:** Intake grid with fixed louvers with filter.
- **GM:** Flow grid with adjustable louvers.

For more details on the control panels and VMF system refer to the dedicated sheet

## VES-I-030-340

### Fan coil unit with Inverter brushless motor for ducted installations

Cooling capacity 1,25 ÷ 5,70 kW  
Heating capacity 1,8 ÷ 10,9 kW

- Horizontal or vertical installation
- Heat exchanger developed to optimize the performance sensitive
- Versions for 2/4 pipe systems
- Large range of available static pressure

EUROVENT LCP

#### DESCRIPTION

Ducted fan coil with inverter technology, for heating, cooling and dehumidifying, specific to work in sensible environment.

Equipped with inverter Brushless motor for an high efficiency and a continuous air flow rate modulation in order to increased comfort and guarantee electric saving. The inverter motor allows a better air temperature regulation based on the real indoor environment requirements without swinging temperature.

The fan unit at available working pressures, brought internal insulation, ensure excellent acoustic comfort levels.

The small dimensions and easy installation make the fan coil designed for 2 and 4-pipe applications.

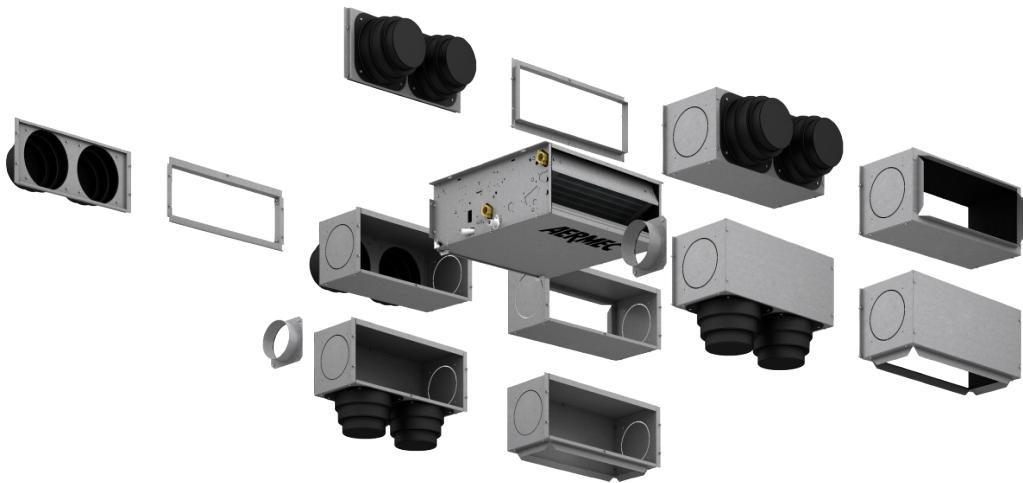

The main coil, reversible during installation, is designed to ensure an high heat transfer, ideal for applications in sensible environment.

#### FEATURES

- Main standard coil or increased for 2-pipe systems
- Main standard coil and additional heating coil (accessory) for 4-pipe system

- 3-way valve accessory
- 2-way valve accessory for variable flow systems
- Fan assembly, high useful head, with aerofoil designed for high performance and simultaneously low-noise comfort
- Centrifugal fans plastic material, in order to reduce power consumption by increasing the ventilation efficiency
- Compatible with the VMF system
- Large range of controllers
- Large range of accessories to satisfy all installation requirements
- Discharge connection supplied loose
- Air filter Class G3, for easy removal and cleaning
- Internal insulation in fire Class 1
- Protective rating IP20
- Fan housing in plastic material removable for easy and useful cleaning
- Easy of installation and maintenance
- Full compliance with safety standards.

## ACCESSORIES

### Control panel

A range of dedicated controllers, wall-mounted or on the machine, is available but it is essential to choose between these panels for simple and complete tuning, for more details please refer to the dedicated sheet.

### Probes and accessories for control panels

**WMT21:** Electronic thermostat with LCD display (wall installation).

**SWAI:** Water temperature probe for WMT21 control panels. Cable length L=2m.

### VMF system

**VMF-E4X:** Wall-mounted user interface. Light grey front panel PANTONE COOL GRAY 1C.

**VMF-E4DX:** Wall-mounted user interface. Grey front panel PANTONE 425C (METAL).

**VMF-E19I:** Thermostat accessory for inverter units to be secured to the side of the fan coil, fitted as standard with an air probe and a water probe.

**VMF-IO:** Expansion board that expands the availability of Digital Inputs and Outputs.

**VMF-LON:** Expansion that allows interfacing with a thermostat with BMS systems using the LON protocol.

**VMF-SW:** water probe to be used, if necessary, to replace the one supplied as standard with VMF-E0X, VMF-E19 and VMF-E19I thermostats, for installation upstream of the valve

**VMF-SW1:** extra water probe to be used for 4-pipe systems with VMF-E19 and VMF-E19I thermostats for overall control in the cold range

### Hot water coil

**BV:** Single row hot water heat exchanger.

### Valve kit

**VCZ\_X4:** Valve kits for single coil units, installed in 4 pipe systems with totally separated "Cooling" and "Heating" circuits. The kit consists of 2 valves with 3-way 4 port connection complete with electro-thermal actuators, insulating shells for the valves and associated hydraulic piping. Version\_X4L valve kit allows left side connection. Version\_X4R valve kit allows right side connection. Power supply 230V ~ 50Hz

**VCF:** kit containing a motorised 3-way valve with insulating shell plus coupling and pipes in insulated copper. Applicable for standard or oversized main coil. Available with 230V and 24V~50Hz power supply.

**VCFD:** Kit consisting of powered 2-way valve, copper couplings and pipes applicable for standard or oversized main coil. Available with 230V and 24V~50Hz power supply.

**VJP/VJP\_M:** Control and balancing combination valve for 2 and 4 pipe systems to install outside the unit, supplied without fittings and hydraulic components. The valve, which can guarantee a constant water flow rate in the terminal, within its operating range, is available with 230V and 24V~50Hz power supply.

The **VJP** is controlled by on-off logic with compatible control panels (accessories)

The **VJP\_M** is controlled by modulating logic with panels not supplied by Aermec

The design water flow rate is crucial to refine the selection of the valve shown in the compatibility table.

### Accessory for Installation

**AMP:** kit for the wall mounting installation.

**BC:** Auxiliary condensate drip tray.

**DSC4:** Condensate drainage device for use when natural run-off is not possible.

**SE:** External air shutter with manual control

### Ducting Accessories:

**RDA\_V:** Straight intake connection with rectangular flange.

**RDAC\_V:** Straight intake connection with circular flanges.

**RPA\_V:** Intake plenum with rectangular flange.

**RDMC\_V:** Straight discharge with circular flanges. Internally insulated.

**PA\_V:** Intake plenum with circular flanges. Flanges in plastic material.

**RPM\_V:** Discharge plenum with rectangular flange. Internally insulated.

**PM\_V:** Discharge plenum with circular flanges. Internally insulated. Flanges in plastic material.

**KFV10:** Circular flanges kit for intake/discharge plenum.

### Grid

**GA:** Intake grid with fixed louvers.

**GAF:** Intake grid with fixed louvers with filter.

**GM:** Flow grid with adjustable louvers.

■ For more details on the control panels and VMF system refer to the dedicated sheet

## ACCESSORIES COMPATIBILITY

## VES-I-5300-7400

**Fan coil unit equipped with inverter Brushless motor  
for ducted installations**

Cooling capacity 4,44 ÷ 11,81 kW  
Heating capacity 9,91 ÷ 25,37 kW

- Horizontal or vertical installation
- Versions for 2/4 pipe systems
- Large range of available static pressure
- Height 217mm (slim line)

EUROVENT LCP

### DESCRIPTION

Ducted fan coil with inverter technology, for heating, cooling and dehumidifying, specific to work in sensible environment.

Equipped with inverter Brushless motor for an high efficiency and a continuous air flow rate modulation in order to increased comfort and guarantee electric saving. The inverter motor allows a better air temperature regulation based on the real indoor environment requirements without swinging temperature.

The fan unit at available working pressures, brought internal insulation, ensure excellent acoustic comfort levels.

The small dimensions and easy installation make the fan coil designed for 2 and 4-pipe applications.

The main coil, is designed to ensure an high heat transfer, ideal for applications in sensible environment.

### FEATURES

- Main standard coil or increased for 2-pipe systems
- Main standard coil and additional heating coil (accessory) for 4-pipe system

- 3-way valve accessory
- 2-way valve accessory for variable flow systems
- Fan assembly, high useful head, with aerofoil designed for high performance and simultaneously low-noise comfort
- Centrifugal fans plastic material, in order to reduce power consumption by increasing the ventilation efficiency
- Compatible with the VMF system
- Large range of controllers
- Large range of accessories to satisfy all installation requirements
- Discharge connection supplied loose
- Air filter Class G3, for easy removal and cleaning
- Internal insulation in fire Class 1
- Protective rating IP20
- Fan housing in plastic material removable for easy and useful cleaning
- Easy of installation and maintenance
- Full compliance with safety standards.
